**This sample was tested for analytes listed in the "Analysis" section of this report using GC Megascreen (TP/311) and LC Megascreen (TP/312), with established Limits of Reporting (LORs).**
**Any positive detections are detailed in the "Analysis Results" section, along with their respective Maximum Residue Limits (MRLs) and LORs. A result of "<LOR" indicates no chemical on the 'Analysis Summary' was detected at a concentration equal to or exceeding the stated LOR.**
**While reasonable efforts have been made to ensure the MRL values align with Australia New Zealand Food Standards Code - Section 20 - Maximum residue limits, Agrifood Technology assumes no liability for the use of this information.**
**MRLS are applicable to the residue total and not to the metabolites.**
